Senior Computer Science student at Liberty University with hands-on experience building data pipelines, databases, and enterprise web applications in both global corporate and mission-driven nonprofit settings. Interested in applying skills in data modeling, visualization, and machine learning to free organizational time and effort for what matters.

EDUCATION

Liberty University, *Lynchburg, VA*

May 2027 (Expected)

Bachelor of Science in Computer Science: Concentration in Data Science | GPA: 3.81

EXPERIENCE

Professional

TMEIC – Energy & Infrastructure Solutions, *Roanoke, VA*

Summer 2026

Applications, AI & ML Intern

- Built a scheduled Python ETL pipeline that parsed and loaded 10+ years of engineering specification data across 250+ projects into a normalized SQL Server schema, replacing a manual data-processing workflow.
- Developed a full-stack enterprise web app (React/TypeScript, .NET Core/C#) with filterable data tables for engineers, PMs and sales teams to look up specification and project records without querying the database directly.
- Created a config-driven Python data pipeline that transforms 1,000+ column solar-plant SCADA historian exports into a standardized schema producing clean time-series data for ML model development.

Pioneer Bible Translators, *Dallas, TX*

Summer 2025

Software Development Intern

- Contributed to a full-stack Phoenix internal tooling application serving 500+ global partners, building features and assisting in PostgreSQL database documentation and schema design decisions, while prioritizing data integrity.
- Developed interaction tracking and data visualization features enabling counselors to identify at-risk team members and surface historical patterns across their team members.
- Participated in biweekly client feedback meetings, presented technical updates and UX concerns for non-technical stakeholders to evaluate progress and shape priorities.

University

Genworth Financial, *Senior Capstone*

Fall 2026 – Present

Capstone Team Member: Leading team of 3 as primary liaison with Genworth stakeholders. Developing a project management plan for an LLM-powered internal synthetic dataset generator.

College of Applied Studies & Academic Success, *Liberty University*

Winter 2024 – Spring 2026

Computer Science Tutor: Conducted 200+ one-on-one appointments guiding students through advanced programming concepts (C++, DSA). Earned Tutor of the Month Award (March 2025).

Office of Spiritual Development, *Liberty University*

Spring 2024 – Spring 2026

Resident Shepherd: Interviewed 30+ students to create a leadership team. Led meeting twice a week to strategically cultivate residence hall culture for 150+ men through social events and small groups

Student Asset Management Fund, *University Club*

Fall 2026 – Present

Junior Analyst: Quantitative Research Group member designing the pipeline and automation for a ridge regression model that grades stock market sectors using macroeconomic and technical indicator data.

SKILLS

Languages: Python • SQL • C++ • C • C# • JavaScript/TypeScript • R • Elixir

Software: React • .NET Core • Phoenix • Git • Azure DevOps • REST APIs • Docker

Data: ETL/ELT • Pandas • Streamlit • SQL Server (SSMS/SSIS) • PostgreSQL • Snowflake • Databricks • dbt Core • Apache Spark (PySpark) • scikit-learn • Dimensional Modeling (Star Schema) • Medallion Architecture • KNIME
